

THE NEWS IN LONDON.

SOUTH AFRICA—IRELAND—"GEORGE ELIOT."
FURTHER TROUBLES APPROPRIATED FROM THE SOUTH AFRICAN REVOLT—MR. BRIGHT RESOLVED NOT TO REPLY TO LORD CARNARVON'S ATTACK—THE MARQUIS OF RIPON CERTAIN TO RETIRE FROM INDIA SOON—IRELAND STILL UNMANAGEABLE—THE LATE "GEORGE ELIOT."

The London cable dispatch to THE TRIBUNE states that the revolt in the Transvaal may cause further troubles in South Africa and give rise to Liberal dissensions at home. An Irish judge says the jury system is ineffective in Ireland. Mr. Bright does not intend to reply to the Earl of Carnarvon. The withdrawal of the Marquis of Ripon from India is deemed certain. Lord Lytton intends to defend his administration. "George Eliot" is to be buried in Kensal Green Cemetery on Wednesday.

LEADING TOPICS IN LONDON.

THE TRANSVAAL REVOLT AND THE IRISH TROUBLE.
OCCUPYING PUBLIC ATTENTION—THE EAST-INDIAN VICEROYALTY—MINISTER LOWELL POPULAR.

[BY CABLE TO THE TRIBUNE.]

LONDON, Saturday, Dec. 25, 1880.

The catastrophe in South Africa divides attention with Ireland momentarily. These most familiar with the condition of the Cape say the disaster is pregnant of other disasters. Moreover, it occasions divisions among the Liberals here, many influential leaders strongly disapproving alike of the original annexation of the Transvaal and Gladstone's decision to retain that ill-gotten booty, justly considering the seizure of the Boers' country an act of lawless violence, the people of the annexed territory almost unanimously opposing it. Now, unhappily, the merits of the question are immaterial—no Government, however convinced of the injustice of using force against a formerly free people, dare to decline to reconquer the revolted province. It is intimated that the Cape people view the disturbance with satisfaction, hoping to secure heavy reinforcements in the Basuto war.

TURBULENCE IN IRELAND.

The situation in Ireland remains essentially unchanged, though steadily growing worse as the tyrannical conspiracy of the Land League tightens its grip on the community. The Government has shown no sign of action, anticipating the suspension of the Land League, as lately intimated. Reports are daily received from magistrates and officials of every degree announcing the impossibility of executing the ordinary processes of law. Mr. Fitzgerald, among the most learned and respected of Irish judges, expresses from the bench doubt of the possibility of continuing to administer justice under the present jury system. "Boycotting" has reached the jury box, the majority of jurors securing verdicts of acquittal by threatening the minority. The Times declares the absence of outrage among the worst symptoms; in truth being an intimation of the terror now general. Agents of the League are no longer obliged to resort to violence to insure obedience to the League's decrees. The Home Rule members of Parliament assemble in Dublin on Monday at Parnell's invitation to settle the programme of the coming session. It is intimated that Parnell and the other indicted members will announce their intention to defy the Court and appear at Westminster. Mr. Chamberlain's friends again assert that to measures of coercion have ever been adopted at a Cabinet meeting. They loudly proclaim such measures never shall be while Mr. Chamberlain is a Minister; all of which affords vast comfort to law-breakers of every degree to which wish each other "Merry Christmas," and plot starvation and ruin to their law-abiding countrymen. Lord Carnarvon's passionate diatribe against Mr. Bright elicits general disapproval, the Liberals denouncing it as a breach of political good manners. The Tories are silent. The speech appears at a most inopportune moment, when Carnarvon's colonial policy is bearing evil fruit. Mr. Bright's friends say he does not intend to reply to it.

GOVERNMENT OF INDIA.

Notwithstanding contradictions, the Marquis of Ripon's friends say his resignation of the Viceroyship of India is expected speedily, and is certain before long. His wife and others near him are seriously alarmed about his health. They think his life will be imperilled if his stay is prolonged. It is well known that Lady Ripon was strongly opposed to his acceptance of the office originally and now is exceedingly anxious for him to resign before his constitution is undermined. Speculation is busy as to his probable successor. Mr. Goschen is again named, but he declined the office before, largely from his wife's opposition, and it is understood he now is desirous of returning to Constantinople to settle the Greek question. Lord Rosebery is much mentioned. His immediate acceptance is impossible. The appointment, if possible, would be extremely popular. People say the Marquis of Ripon is greatly liked by the natives and has done much to efface the evil impression left by Lord Lytton. Lord Lytton is reported to be much annoyed by the coldness of his reception on returning to England, he meeting indifference even among Tories; hence his extraordinary illegal outburst in speaking to the volunteers, who were fairly infuriated by his conduct.

by a circle of intimately-attached friends. Herbert Spencer contradicts the story that he educated "George Eliot," saying he knew her only after her character was formed, after she translated the "Life of Jesus," by Strauss, or after 1851, when she was already distinguished by that breadth of culture and universality of power which has since made her known all over the world. A private meeting, convened yesterday, at the Athenaeum Club, of eminent friends, unanimously resolved against the injudicious proposal for her burial in Westminster Abbey. Dean Stanley was ready to accede to the proposal, if desired. It is now settled that her funeral will take place on Wednesday, in Kensal Green.

MINISTER LOWELL.

Many Americans in London are inquiring with solicitude whether General Garfield intends to retain Mr. Lowell as Minister to England. There is a universal desire that Mr. Lowell should continue at the post which he has filled under difficult public circumstances and stress of domestic trouble with singular ability and general acceptance. The real truth is that no American Minister has shown himself more uncompromisingly American, winning, nevertheless, great popularity among the best English people, with a wide and favorable reputation among all classes, and marked admiration from officials for conspicuous ability in the transaction of diplomatic business. I hear numerous expressions of opinion of his English friends and American alike deprecating a change.

G. W. S.

GENERAL FOREIGN NEWS.

TRYING TO SETTLE THE GREEK CLAIM.

RUSSIA FAVORABLE TO ARBITRATION.

LONDON, Saturday, Dec. 25, 1880.

The *Agence Havas*, of St. Petersburg, in announcing that Russia has agreed to arbitration of the Greek frontier question provided that Turkey and Greece promise to accept the decision of the Powers, explains that the refusal by Greece to accept the arbitration does not refer to the proposal of the Powers but to the demand put forward by Turkey.

A better dispatch from Athens says that two members of the diplomatic body recently had an unofficial interview with M. Comandour, President of the Council and Minister of Foreign Affairs, relative to European arbitration, and it is understood, he declined the proposal.

If the Powers accede to arbitration of the Greek question, it will stipulate that Ottoman troops shall occupy the Balkans.

A dispatch from Paris to *The Times* says: The arbitration proposal is regarded as acceptable by all the Powers, on the basis proposed by the North German Confederation, that the Powers and Greece should be asked whether they are willing to submit to the award of the Powers, and that the Powers shall not consider themselves bound to accept the award if it is not accepted by a majority of four shall be regarded as binding on the minority.

The Russian Minister at Athens has been summoned to St. Petersburg to enlighten the Czar on the Greek question and to receive instructions.

THE BRITISH FAR WEST.

FAILURE OF THE GRAIN CROP OF THE SASKATCHEWAN DISTRICT.

WINNIPEG, Man., Dec. 25.—The Hudson's Bay Company recently sent a gang of men up the Saskatchewan River to bring down grain. They secured a good seam, three feet thick, about fifteen miles up, but were prevented by the ice running down the river from bringing much away.

Mr. Lucas, the Indian farm instructor at Prince Albert, Northwest Territory, reports that his mission is a success. There are between 400 and 500 Indians under his charge, and these, he reports, are making good progress in agricultural pursuits. About 2,000 bushels of wheat were raised this year. The Indians are acquiring habits of civility, building houses, and are generally kind and industrious. An answer was given to the latest news from the Saskatchewan district shows that the grain crop of this year is a partial failure both in quantity and quality, owing to the late spring, the early summer, and the early fall frost. Although much more grain was sown than last year, it is doubtful if there will be as many bushels threshed, and what there is will not be of as good a quality.

THE REVOLT IN THE TRANSVAAL.

LONDON, Saturday, Dec. 25, 1880.

A dispatch from Durban to *The Times* says: Sir George Pomeroy Colley has received a dispatch from Pretoria dated the 15th inst., communicating a decree of the Transvaal Republic declaring that there was no desire to split blood, nor did the Republic wish to be drawn into a British war, and that the Republic would be forced to appeal to the Powers for aid, which would be done with all reverence for the Queen, and with the full knowledge that it was a struggle for the safety of the British Empire. After this utterance there can be no doubt that the British Government will be anxious to cooperate with England in everything that would be to the advantage of the Republic, and its independence was acknowledged. An answer was expected within twenty-four hours.

Mr. Lucas, the Indian farm instructor at Prince Albert, Northwest Territory, reports that his mission is a success. There are between 400 and 500 Indians under his charge, and these, he reports, are making good progress in agricultural pursuits. About 2,000 bushels of wheat were raised this year. The Indians are acquiring habits of civility, building houses, and are generally kind and industrious. An answer was given to the latest news from the Saskatchewan district shows that the grain crop of this year is a partial failure both in quantity and quality, owing to the late spring, the early summer, and the early fall frost. Although much more grain was sown than last year, it is doubtful if there will be as many bushels threshed, and what there is will not be of as good a quality.

REPORTED PAPAL OPINIONS.

LONDON, Saturday, Dec. 25, 1880.

The correspondent of *The Times* at Rome says: "I am justified in asserting that the Land League in Ireland falls distinctly within the category of Associations regarded by the Vatican as revolutionary, and when the Pope, as in the document published in the *Osservatore Romano*, deplores the serious character of the agitation in Ireland, etc., for the official press of the Vatican can hardly speak of revolutionary movements as being outside the sphere of revolutionary movements. After this utterance there can be no doubt that the British Government will be anxious to cooperate with England in everything that would be to the advantage of the Republic, and its independence was acknowledged. An answer was expected within twenty-four hours.

SUICIDE OF A PRESIDENT-ELECT.

BERNE, Saturday, Dec. 25, 1880.

M. Anderwert, who was recently elected President of the Swiss Confederation for 1881, committed suicide at 9 o'clock this evening in the public promenade, by shooting himself with a revolver. (The Swiss President is elected annually by the Federal Assembly.)

TO EUROPE BY WAY OF HALIFAX.

HALIFAX, N. S., Dec. 25.—The purchase by the Government last summer of the *Riviere du Loup* Branch has reduced the winter travel in the public conveyance to Halifax as a point of ocean shipment. There are also saved, in addition, three days' time in crossing the Atlantic each way. The cost of labor at Halifax and New York also comes in favor of the former, while the following is the difference in custom and port dues: Halifax, \$32.50; New York, \$41.00; Baltimore, \$41.00; Philadelphia, \$42.40; Boston, \$36.30.

MILLE BERNHARDT IN MONTREAL.

Montreal, Dec. 25.—Sarah Bernhardt gave performances to-day, in the afternoon and evening, and both were fairly attended. This concludes her engagement here. She will leave for the United States on Monday.

A NEW TELEGRAPH LINE.

St. JOHN, N. B., Dec. 25.—Telegraphic communication with Grand Manan has been opened.

FOREIGN NOTES.

LONDON, Dec. 26, 1880.

The second session of the Provisional Assembly of Eastern Roumelia was closed yesterday by Alois Paen, Governor-General, in the presence of the Consular body. The Hamburg-American Line steamer *Silesia*, Captain Albers, from Hamburg for New-York, which sailed from Havre yesterday, took out from the latter port the sum of \$200,000 in specie.

RAILROAD CASUALTIES.

CHARLOTTE, N. C., Dec. 25.—There was a collision on the Atlantic and Charlotte Railroad yesterday at 11 a. m., about twelve miles north of Atlanta, between the south-bound Charlotte express train and the second section of a north-bound freight train. Peter Keys, the engineer of the express train, was instantly

killed, and his colored fireman so severely injured that he died in two hours afterward. Kidwell, the engineer of the freight train, and his fireman both jumped off and escaped injury. There is a conflict as to the responsibility. No passenger was hurt. The last mail from the South and the express train, both due early this morning, were delayed by the wreck.

THE GRAIN CROP OF KANSAS.

A LARGE PRODUCT THE COMING YEAR.

FAVORABLE REPORTS FROM FARMERS ALONG THE LINE OF THE KANSAS PACIFIC—THE GROUND AND PLANTS IN GOOD CONDITION.

KANSAS CITY, Mo., Dec. 24.—The Land Commissioner of the Kansas Division of the Union Pacific Railroad has just received interesting reports on the condition of the winter grain crop along the line of the Kansas Division. The reports embrace the period between December 15 and December 20. The winter wheat in Russell County is in excellent condition, and in Colver County the prospect for a good crop has not been better since the country has been opened up. Ottawa County has not had so good an outlook for a heavy crop in ten years, and a good ground look is looked for on 3,000 acres of the Ottawa County. A great deal of wheat was sown late in Gove County, but the ground was in good condition when winter set in. Ellis County farmers are more hopeful of a good crop than they have been for five years. A good ground look is looked for on 3,000 acres of the Ottawa County. A great deal of wheat was sown late in Gove County, but the ground was in good condition when winter set in. Ellis County farmers are more hopeful of a good crop than they have been for five years. A good ground look is looked for on 3,000 acres of the Ottawa County.
